AI ENGINEER INTERN

Enadoc

I am writing to express my interest in the position of Software Engineering Intern at your company. As a software engineering student with hands-on experience in AI and development through my ongoing internship, I'm looking forward to applying my skills and enthusiasm to your innovative team.

At Enadoc, through my internship, I focused on building real world AI applications. I contributed to the YOLOv8-based facial verification module and a CNN + OCR system for identifying field entries in scanned forms. Projects like these boosted automation and accuracy in document processing, reducing human effort and raising data completeness.

I eagerly await the opportunity to speak further about how my experience and passion for AI and software development can help your team. I appreciate your time in reviewing my application.

Best Regards,

Chamika.
